PROGRAM DESCRIPTION

This **Annual Jagelman International Colorectal Disease Symposium** is once again merged with the **Annual Turnbull Symposium** this year and will be held in Fort Lauderdale, Florida. The 2014 event will commemorate the 25th Anniversary for the Jagelman symposium and the 35th Anniversary for the Turnbull symposium. During this combined event we hope to welcome at least 800 registrants from over 60 countries.

The program is designed to provide a comprehensive, in-depth, detailed overview of new, controversial, challenging, and provocative colorectal themes. A live surgery day, an Advanced Transanal Surgery Workshop & Wet Lab and an afternoon of scientific paper/poster/video presentations at Cleveland Clinic Florida are being offered as additional educational opportunities. The meeting will occur during five comprehensive days, four of which will include 16 scientific sessions, including over 115 podium presentations and 8 hours of interactive panel discussions with challenging questions and informative answers. In addition, formal exchange amongst the faculty and registrants will be encouraged during breakfast, lunch and breaks. The topics were selected from the surveys during the last several years' symposia participants as well as through a variety of expert opinions, literature review and physician competencies. Therefore, the program is designed to include a mixture of the most innovative techniques and technologies. Attendance at the symposium will provide the registrants with a detailed analysis of the current status of virtually every major colorectal area. Video demonstrations will help improve competencies and patient outcomes. Both expected and adverse outcomes as well as the recognition and management of such outcomes will be emphasized. Numerous lectures and, in fact, one entire panel will be centered upon the definitions and optimization of patient outcomes. Interdisciplinary integration amongst surgery, gastroenterology and pathology will be emphasized.

TARGET AUDIENCE

Physicians, residents, nurses, wound care professionals and allied health professionals in colorectal surgery, general surgery and gastroenterology.

TOPICS

- Minimally Invasive Surgery
- Robotics
- Surgical Innovation
- Avoiding and Managing Complications
- Practicing Cost Effective Colorectal Surgery
- Optimizing Patient Outcomes
- Multidisciplinary Team Approaches to Colorectal Disorders

OBJECTIVES

- Describe the determinants of optimizing the results of surgery for rectal carcinoma
- Evaluate new methods of minimally invasive surgery
- Discuss the current controversies in the surgical management of inflammatory bowel disease
- Identify methods of measuring outcomes in colorectal surgery
- Assess new treatments for fecal incontinence, anal fistulae, anal fissure and hemorrhoids.

CREDITS

Accreditation

Cleveland Clinic Florida is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians.

Designation of Credit

Cleveland Clinic Florida designates this educational activity for a maximum of 34.25 *AMA PRA Category 1 Credits™*. Additional credits are available for the Live Surgery Day (4.5) and Transanal Surgery Workshop (6.5). Physicians should only claim credit commensurate with the extent of their participation in the activity. **Total available credits: 45.25**

Other Credits

AOA This course may be submitted for American Osteopathic Association continuing medical education credit in Category 2-A.

NURSING Approved by the Florida Board of Nursing, NCE Provider #2334, for 34.25 contact hours. Each nurse should claim only those hours that he/she actually spent in this educational activity. To receive credit, nurses are required to provide: license number, completed course evaluation, completed attendance record form.
